

1. When a user goes to www.dreamingdata.com, they will be first greeted with the admin login screen. If they don't have this access, they will be unable to enter the rest of the website. Proper errors and success messages are displayed when the user unsuccessfully (red) or successfully (green) fills out the email and password fields.

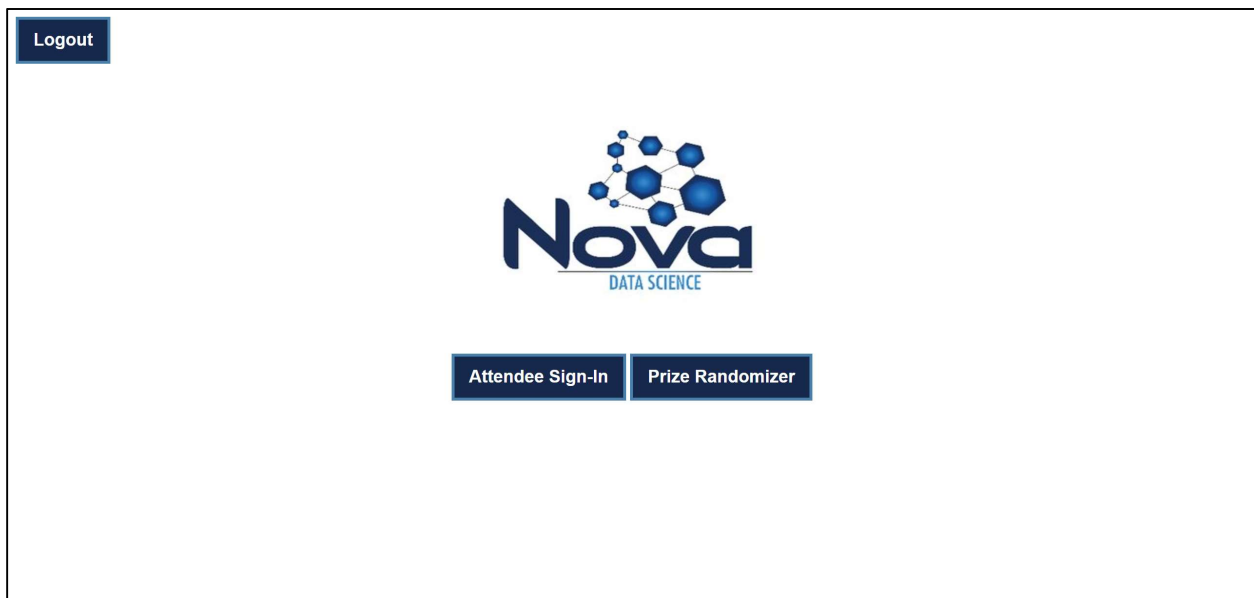

The image shows a web form titled "Admin Login". It has two input fields: "Email:" and "Password:". Below the fields is a blue "Login" button. The form is set against a white background with a dark border.

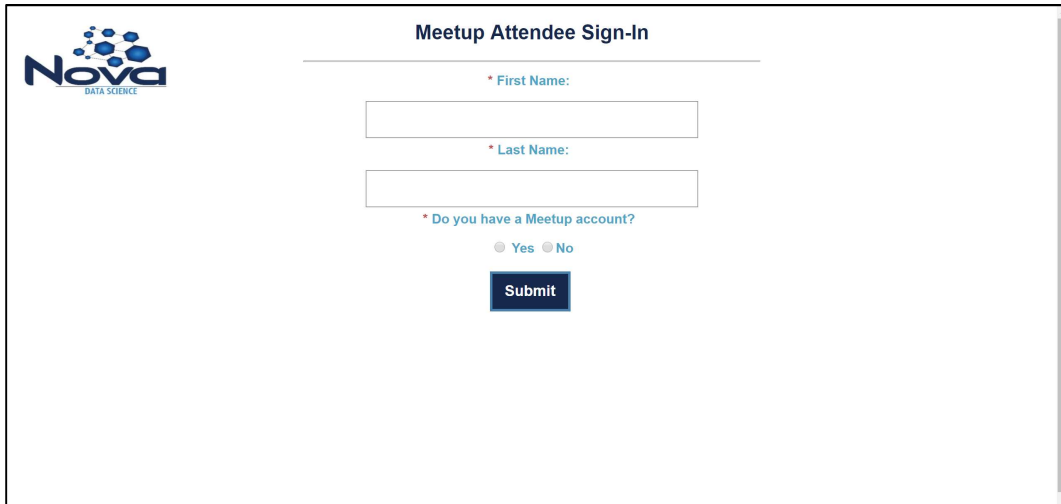

The image shows the same "Admin Login" form as the previous one, but with a red error message box at the top. The message box contains three bullet points: "Email: Please fill out this field.", "Password: Please fill out this field.", and "The email address is badly formatted." The form fields and the "Login" button are still visible below the error message.

2. After the admin signs in they will be shown a much better screen with a logout button on the upper left hand corner. If the admin clicks logout, they will be logged out and will have to fill out the admin login form again in order to see this page. There are two other options that an admin has. They can either pick attendee sign-in to sign-in attendees or a prize randomizer to figure out who wins the prize.

The image shows a web page titled "Admin Dashboard". In the top left corner, there is a blue "Logout" button. In the center, there is a logo for "Nova DATA SCIENCE". Below the logo, there are two blue buttons: "Attendee Sign-In" and "Prize Randomizer". The page has a white background with a dark border.

3. Click on Attendee Sign-In. This is the page that attendees will use to sign-in. It asks for a first and last name followed by whether the user has a meetup account. If the user doesn't, the user can submit the form without filling out another field. However, if the user clicks yes they will have to fill out a field with the meetup name. Proper messages are displayed for errors on the form as well as success. Once successful, the user will see a green box that shows that it was successful. Check firebase to see whether it was successful under the correct date (the day of the meetup date or in other words the current date).

 **Meetup Attendee Sign-In**

* First Name:

* Last Name:

* Do you have a Meetup account?

☐ Yes ☐ No

- Head back to the main page www.dreamingdata.com. Click on the second button prize randomizer. This is to be clicked once all the attendees have filled out the form to see who will win the prize. The admin can enter the number of prizes for that meetup and hit the button calculate winners. Based on the number typed in it will give a numbered list of the winners. However, if a negative, zero, or value of nothing is typed in an error will be displayed.

Meetup Attendee Prize Randomizer

Enter the number of prizes to randomly pick attendees!
